Variation Biotechnologies Inc. (VBI) is an emerging vaccine development company with exciting prospects for growth. The company is focused on vaccines for pathogens where genetic variability presents a challenge for the development of effective vaccines. VBI is a venture financed start-up seeking vibrant and enthusiastic scientists and entrepreneurs to join us in our quest to *Create Intelligent Vaccines for Humanity*.

Post-doctoral Research Scientist - Immunology

Responsibilities:

- Perform research studies to test the immunogenicity and protective activity of vaccines in animals.
- Develop and conduct assays to measure antibody and cellular immune responses.
- Maintain mammalian cell cultures, grow viruses, and perform basic virological procedures, such as plaque and neutralization assays.
- Participate in vaccine production, purification and formulation.
- Document data in laboratory notebooks. Analyze and present results and prepare experimental reports.

Qualifications:

- PhD or MD degree with a strong background in immunology or virology.
- Previous experience with immunological methods, cell culture and virus work.
- Excellent writing, verbal communication and interpersonal skills.
- Strong computer skills.
